This special handlebar is the low-priced GILLES TOOLING alternative to the adjustable VarioBar

Material and features:

- Aluminium AL 2007, natural colour
- Extremely lightweight handlebar - 246 Gramm
- Simple construction out of two parts
- Exchangeable handlebar tube
- Ideal as get off part / replacement handlebar for OEM
- Fixed inclination angle 6 degree is the optimum compromise between a sporty and relaxed rider's sitting position
- Available for diameters 35-50 mm (see table)
- TÜV parts certification
- elongation of handlebar tube by adaptive handlebar weights (optional, more info see presentation 'handlebar weights')

The above sketch shows the position of the handlebar on the bike in order to enable an exact mounting (values in mm).
