100 mm / (+ 60mm)	AK-100-*
Standard	

Handlebar modification only possible with extension kit.

Mounting kit

Performance:	Art.no.
Mounting kit extension	ABK-BY-A

Colour code*: G=golden / S = silver / B = black

The SV 650S stock handlebar position is often criticized. VarioBar offers a real alternative to this problem:

Thanks to the bending of the VarioBar handlebar the inclination angle can be adjusted from +16° to - 16 °. For each angle adjustment (in 4° steps) the height changes of 17 mm.

Due to the gear tooth forming, the extension can be exactly adjusted to the front or to the rear. All extension/ riser options possible! The 100mm extension (standard) enables a closer rider position.

All necessary mounting parts enclosed to the set. Basically all VarioBars are designed to enable mountings without modifications on the bike.
