Other extension options		not possible
Miscellaneous	Handlebar weights (LG-20-*) included in kit!!	

### General product informations

The inclination angle of the VarioBar handlebar can be adjusted from +16° to - 16°.

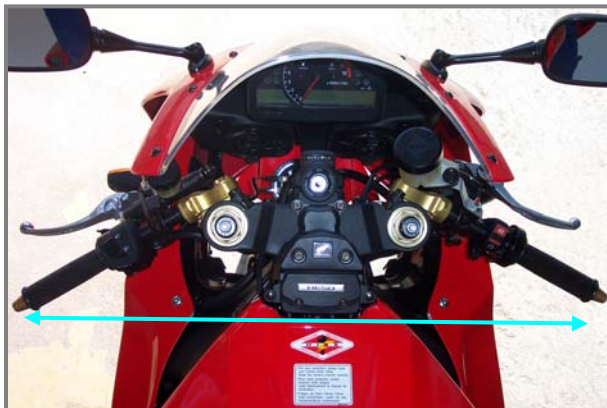

For each angle adjustment (in 4° steps) the height changes of 17 mm.

Due to the gear tooth forming, the extension can be exactly adjusted to the front or to the rear.

Please note that the adjustment possibilities can vary depending on the model.

When using longer brake hoses/ speed wires resp. when modifying the covering the handlebar offers more adjustment possibilities.

**Info:** The handlebar can be used as well as sport handlebar when removing the extension.
