Standard-clamp	VB-43-SA-*
Hinged-clamp	Not available
Mounting-kit basis	ABK-RJ05-B

Extension kit

Length extension	Art.-no.
• 60 mm	AK-60-*
• 70 mm	not possible
• 80 mm	not possible
• 100 mm	not possible

Mounting kit

Performance	Art.-no.
Mounting kit extension	ABK-RJ05-A

Colour code\*: G=golden / S = silver / B = black

The sporty riding position of the YZF R6 can be considerably changed into a higher position of 50 mm more with the extension. VarioBar basic handlebar still offers the same height of the stock race position.

Thanks to the bending of the VarioBar handlebar the inclination angle can be adjusted from +16° to - 16°. For each angle adjustment (in 4° steps) the height changes of 17 mm.

Due to the gear tooth forming, the extension can be exactly adjusted to the front or to the rear. But the adjustment possibilities on the R6 are limited. When using longer brake hoses/ speed wires resp. when modifying the covering the handlebar offers more adjustment possibilities.

The handlebar is 30 mm larger than the stock one after the mounting. The stock handlebar weights can be used again. The mounting time is about 2.5 hours.

All necessary mounting parts enclosed to the set. Basically all VarioBars are designed to enable mountings without modifications on the bike.
