GENERAL PRODUCT INFORMATION

The inclination angle of the VarioBar handlebar can be adjusted from +16° to - 16°.

Each angle adjustment (in 4° steps) changes the height for 17 mm.

Due to the gear tooth forming, the extension can be exactly adjusted to the front or to the rear.

Please note that the adjust possibilities can vary depending on the model.

When using longer brake hoses/ speed wires resp. when modifying the covering the handlebar offers more adjustment possibilities.
