| | |
|------------------------|----------------|
| Performance: | Art.no. |
| Mounting kit extension | ABK-PA-A |

Colour code*: G = gold / S = silver / B = black

with extension 80 mm / serial performance

The inclination angle of the VarioBar handlebar can be adjusted from +16° to - 16 °.

For each angle adjustment (in 4° steps) the height changes of 17 mm.

Due to the gear tooth forming, the extension can be exactly adjusted to the front or to the rear

Please note that the adjust possibilities can vary depending on the model.

When using longer brake hoses/ speed wires resp. when modifying the covering the handlebar offers more adjustment possibilities
